BDO: 000074975

We were prompted to use growAp services by the results the company achieved for the KFC network. The beginning of our cooperation was an audit, which identified the problems we were facing and set goals for us to achieve. From the very beginning of this cooperation, we felt that we were dealing with experts in the field of managing Google Business Profiles. Well-organized processes, vast knowledge, thoughtful action, and above all, results visible already in the first weeks of work. We wish everyone such business partners!
